10:00 a. m.

222MB LINE DANCING-BEGINNER LEVEL - BEGINNERS ONLY!! - (NOTE: THIS CLASS DOES NOT START UNTIL APRIL 10TH): The beginner level is for those with little to no prior line dance experience, who enjoy moving to music at a low impact level. We will start with teaching some of the basic and most common line dance steps, both with and without music. The instruction will progress to performing beginner level dances. Usually, one single turn to either side is common, in order to repeat the dance on another wall. Movement can be adapted to adjust the pace for people who have difficulty with dizziness stimulated by quick or multiple turns. **The class is taught by Lenora Corbett who has been a line dancer for over 10 years.**

437MB MAH JONGG: (Class starts at 10:30 a.m.) *This is a fascinating rummy-like game played with tiles rather than cards.* The game originated in China, dating back to the time of Confucius. NEW 732MC HOW TO READ, ANALYZE, AND APPRECIATE POETRY: **Have you or anyone you know ever said, "I just don't get what poetry is about?" If so, this class is for you.** Poetry isn't only about trees and flowers, nor is it just made up of "emotional" language, bad rhymes, or fuzzy images. It contains structure and logic, rhythmic regularity, and even mathematical precision. The genre has been spoken to people for generations and can provide us with deeper insight into our shared life experience. Being aware of their choices can guide us to a better comprehension of what they are leading us to discover and think about. Class will operate on a combination of short lectures, small group work (to enhance interpretation skills), and general discussion with some exercises on specific types of poems. **Instructor: Fr. Tony Grasso, CSC, Ph. D. has taught high school English and been an English professor at King's College, Wilkes-Barre, PA, for 37 years.** Handout packets and online materials are readily available without cost.

NEW 148MC THE HISTORY OF SPAIN: **Spain is a history of the Iberian Peninsula - But geography only provides the pathway; the real story is about the different peoples and cultures that came to Spain, and how each group brought much to Spain's growing culture.** The lectures begin some 500,000 years ago in the Paleolithic age, followed by Neolithic farmers. Other settlers brought bronze and iron tools and began to build walled towns. Phoenicians and Greeks settled on the peninsula; Celtic tribes crossed the Pyrenees. Rome swept in about the 3rd century BCE. Only to be overrun by barbarian tribes, including Visigoths, who were invaded by Muslims who established the kingdom of al-Andalus. Trace Spain's conquest of the New World as men like Columbus and Pizarro brought Spanish culture across the Atlantic. And much more by Professor Joyce E. Salisbury, Ph.D. **Facilitator: Fahim Ahmed, Retired Founder & CEO of WWT Inc. Grand Prize winner of the Harold S. Geneen Award**

807MC CONVERSATIONAL SPANISH LANGUAGE: THIS CLASS IS ALREADY FULL

Dance selections will be made at the “improver” more than “intermediate” levels for this class. Dances at this level will be low impact, with turns and changes in tempo and movement patterns to increase the degree of difficulty. Movements (and turns) can be adapted to adjust to individual needs. **The class is taught by Lenora Corbett who has been a line dancer for over 10 years**

480TA THE WORLD’S GREATEST GEOLOGICAL WONDERS: Explorer the Earth's natural features. Ever wonder what happens when the Earth's tectonic plates shift, and learn about the result? Did you know that the Dead Sea is sinking and wonder why? Learn about a wonderful world of ice that covers Antarctica. How has the Ganges River Delta impacted our civilization? What has caused the Himalayas to rise, and become the World's highest mountain range? **This and more will be explored as we learn about some of the Earth's most fantastic features. Craig Curran will moderate this course.**

435TA CURRENT EVENTS: *Focuses on emerging events or trends that may well have a significant impact on our society.* This includes technical, cultural, medical, financial, scientific, and broad political trends that we may have heard of, but generally have relatively little information on. Topics that are extremely controversial are avoided where possible, as they generally have both extensive and heated coverage that generate far more heat than light. Topics are typically introduced by about a 30-minute presentation followed by general discussion. ***Differences of opinion are welcome but personal attacks and labeling of ideas (e.g. socialist, fascist, racist, bleeding-heart) are not unless the opinion giver has identified themselves as such. Jim Thompson is the moderator.***

600TC GREECE AND ROME: AN INTEGRATED HISTORY: Join Helen Bennett as we continue to explore the comparisons between these great ancient empires. Find out why the Greeks lost, and the Romans won, although the latter was dependent on the culture of the former. Latin literature showed racial prejudice against the Greeks; so, what else is new?
